Answer Key

Students: After reading "Connections," fill in the four-step stages of metamorphosis for three animals from the article in the flow map below. Answer the questions at the end.

Parents/Teachers: Sample answers are below, however, students may pick different animals than these named.

What is the life cycle? Animals change through life cycles. There are four stages of these — birth, adult development, reproduction and death.

How can metamorphosis differ in some animals? Name a few animals that differ metamorphosis from the ones you used above.

Some insects have a three-stage egg-nymph-adult life cycle rather than four. Examples include cockroaches, butterflies and grasshoppers.
